DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eisele et al (4,086,878) in view of Abello (3,897,757). Eisele discloses the claimed invention except the compression ratio of 11 to 16. Abello discloses a compression ration range of 11 to 16. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a compression ratio as taught by Abello in the invention of Eisele to improve efficiency of the system.

Allowable Subject Matter

Claims 1, 2, 4, 6 and 7 are allowed.
